1. INTRODUCTION

R.B.I. BASEBALL 2 simulates real baseball. Most of the rules and strategies of the actual game apply. You must bat, pitch, field, run and substitute players well to achieve success.

Each player in the game has his own strengths and weaknesses based on his real life statistics. For batters, the stats include his position, hitting ability, power, running speed and whether he is right or left handed. For pitchers, the stats include his control, pitching speed and stamina. All the players in R.B.I. Baseball 2 were developed from the 1989 statistics of the actual pros. For example, a player who stole numerous bases and had a high batting average in real life will have a high speed in the game. A player with numerous home runs in real life will have a good power rating in the game. You will learn through experience how to best manage your favorite teams and players.

3. OFFENSE CONTROLS

At Bat:

Control Pad: Move the batter's position in batter's box.

A Button: Batter swings bat. Press and hold for a complete swing. To bunt, press and release the button quickly or press SELECT, as described in the following paragraph.

SELECT: Use this button to bunt. Press once and the batter prepares to bunt. If the pitch is a ball, press again and the bat will return to the ready position. If you press too late, a strike will be called.

Base Running Control:

Control Pad:

Up: Runner advances/returns to second base.

Down: Runner advances to home plate.

Left: Runner advances/returns to third base.

Right: Runner returns to first base.

B Button: Base runner advances to the next base. Choose the base you want the runner to run to with the control pad and press the B button. Use the B button to steal bases, for hit and run plays, squeeze plays and to advance extra bases during a play.

A Button: Base runner returns to the previous base. Choose the base you want the runner to run to with the control pad and press the A button.

Note: The base runners run as soon as the ball is hit. When a fly ball is hit, it is up to the player to make all of the base runners go back to avoid a double or triple play. After tagging up you may advance to the next base.

Batter Time-Out Options:

(Press START to call time out)

Substitutions: Change a batter or base runner.

Move the cursor to the player you wish to remove from the lineup. His name appears at the top of the screen under the word "Replace." Now move the cursor to the player you wish to insert from the bench. His name appears to the right of the person he is replacing. To view additional stats press SELECT. Press the A button to substitute and START to not substitute.

Switch Hlt: Switch to left or right handed batting. Only batters who are switch hitters may do this.

Fielding the Ball:

Control Pad: Moves your fielders —

Up, Down, Left or Right

After the ball is hit, you may dive and jump for the ball. Press either the A or B button when the ball is near you and you will jump or dive. You can jump when the ball is in the air. You can dive when the ball is on the ground (or very near it). Press right or left to control the direction of the dive. By timing this correctly, you can field many balls you would not normally be able to field.

Note: It is possible, though very hard, to make a diving catch. You must wait until the ball is very close to the ground before attempting to dive. Otherwise, you will jump and miss the ball.

A Button: Press the button to throw the ball. The ball will be thrown to the base you select with the control pad. When no base is selected, the ball will be thrown to first base.

B Button: Press the button to run to a base. The fielder will run to the base you select with the control pad. When no base is selected, the fielder will run to first base.

Errors: Occasionally a fielder will "bungle" the ball or make a poor throw. Avoid throwing the ball to a base when a fielder has left the position. The chance for errors is based on the team you are using.

Pitcher Time-Out Options:

(Press START to call time out)

New Pitcher: Move the cursor to the desired relief pitcher. Press the A button to do the substitution.

New Fielder: Move the cursor to the player that you wish to remove from the line up. His name appears at the top of the screen, below the word "Replace." Now move the cursor to the player you wish to insert from the bench. His name appears to the right of the person he is replacing. You may view additional stats by pressing SELECT. Press the A button to substitute, START to not substitute.

Scoreboard: Press the B button to see the scoreboard

Play Ball: Return to play

Instant Replay: See instant replay of the last play that happened. Some plays cannot be viewed by instant replay.

5. WATCH MODE:

Watch mode can also be used as a training mode or a manager mode. In this mode, the computer will control the game, but you may participate by using the controller. To manage, let the computer play the game while you substitute players and tell runners to steal bases. To train, let the computer do the difficult fielding while you do the easier fielding.

6. SERIES PLAY:

In a series, a starting pitcher may only appear as often as every other game. Keep this in mind when you are playing a series. If you use all the best starting pitchers in your first game, they will not be available in the second. In two player mode you play a seven game series. In one player mode, you can play a seven game series by choosing one team from the National League and one from the American League or you can play all the teams in the league by choosing two teams from the same league.

7. TIPS:

Pitching:

The starting pitchers have more stamina than the relievers. Always be aware of your pitcher's ability because he gets tired. Keep an eye on the MPH and how much you can move the pitches sideways. The fastball and sinkerball will use more stamina than normal pitches. When pitching to the computer, especially when a power hitter is batting, try not to throw it over the middle of the plate. Using the sinkerball when you have two strikes on the batter is often a good tactic.

Fielding:

You should begin to move your fielders as soon as the ball is hit. Get familiar with the starting points of all your fielders so you can react quickly instead of waiting until you see the fielders. When a pop fly is hit, you need to predict where the ball is going to land and move the closest player to that destination. Adjustments should be made based on the shadow of the ball and the tone that indicates the height of the ball.

Batting: Do not stand still in the batter's box. Deceive the pitcher as to where you will be when the ball is thrown.

General: If you replace a fielder with a player that is not from the same position, there will be more errors.

Never talk to your opponent about the last pitch. If he knows what you think about it, that may help him on the next pitch.

When you throw or run with the ball, choose the desired direction with the control pad, then press the A or B button. Do not select a direction, let go, then press the A or B button. You must hold the control pad arrow until after the button is pressed.

ROSTERS**

RBI Baseball 2 is the only baseball game for play on the Nintendo Entertainment System that uses real players and their actual 1989 stats. Armed with these numbers, you can make all the decisions a real manager makes. Important information like each player's batting average, speed and number of home runs will help you decide which players to put on the field to get a real winning combination. COMPLIANCE WITH FCC REGULATIONS

This equipment generates and uses radio frequency energy and if not installed and used properly, that is, in strict accordance with the manufacturer's instructions, may cause interference to radio and television reception. It has been type tested and found to comply with the limits for a Class B computing device in accordance with the specifications in Subpart J of Part 15 of FCC Rules, which are designed to provide reasonable protection against such interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient the receiving antenna.
- Relocate the NES with respect to the receiver.
- Move the NES away from the receiver.
- Plug the NES into a different outlet so that computer and receiver are on different circuits.

If necessary, the user should consult the dealer or an experienced radio/television technician for additional suggestions. The user may find the following booklet prepared by the Federal Communications Commission helpful:

How to Identify and Resolve Radio-TV Interference Problems

This booklet is available from the U.S. Government Printing Office, Washington, D.C. 20402, Stock No. 004-000-00345-4.
